CSCi and SecureAgent - Business Partnership Disaster Recovery and Business Continuity Solutions for Federal & State Local Government

WARRENSBURG, MO and TULSA, OK (August 11, 2009) – With government regulations about data security increasing in both number and severity, data managers are asking for innovative, cost-effective ways to protect their critical data. SecureAgent Software and Computer Security Consulting Inc. (CSCi), are working together to make that happen – now! This affiliation will allow both companies to provide strategic data recovery and backup solutions to the United States Federal Government. This will allow the combined experience of both firms to address the critical need in the federal infrastructure for business continuity to the; open-systems, mid-range and mainframe environments. The companies will feature the SecureAgent, *Secure Data Solution* ® enhanced backup and recovery solution. The combination of CSCi's experience in the federal market combines and SecureAgent's patented technology will create a win-win scenario for federal agencies in need of disaster recovery and business continuity solutions.

The patented *Secure Data Solution* ® (SDS) disk-to-disk technology delivers increased performance reliability; lower operating costs and enhanced productivity. The SDS can completely eliminate or drastically reduce the number of physical tape stock, tape drives, maintenance, off-site tape storage and logistics to further reduce user costs. Proprietary software features insure secure data compression and encryption at the highest legal levels throughout the process.

A communications controller by SecureAgent consolidates secure remote user access connectivity from any location with remote console control features that include data encryption, data compression, Request-Challenge-Response user authentication and remote recovery system.

SecureAgent has earned not only an impeccable reputation as a pioneering data services solution provider, but also has been awarded more than a dozen U.S. and European patents. SecureAgent data management applications are in use throughout the United States and Europe. They are a preferred solution for some of the world's largest banks, communication companies and tier-one outsourcers.

As a Service Disabled Veteran Owned Small Business (SDVOSB), CSCi has provided Continuity of Operations Planning, Contingency Plans, Risk Assessment/Mitigation, and Business Continuity/Disaster Recovery for many federal agencies and this solution is by far the best solution for all levels of moderate and large size businesses.

CSCi understands the value of providing the commercial, state, and federal government a secure, reliable, and complete package that is aimed at saving hard earned dollars. Disaster Recovery is just one of the many solutions the SecureAgent/CSCi partnership offers. The daily operational and maintenance cost are driven drastically lower and provides the client with a greater level of redundancy, regardless of the recovery location. Our solutions build upon the state of the art technology and offer you a Return on Investment (ROI) faster than any product you will use in your Business Continuity/Disaster Recovery BC/DR process.

A key component of our delivery methodology is your TCO - performance based contracting with a focus on the business processes, the structure and the mission of our client. Weekly progress is taken from structured project plans and is provided in clear, concise reporting that identifies the tasks, the costs, and the issues of the project. The synergistic design of our collaborative EVM model is the core of delivering quality service to our clients.

(Over, please.)

CSCi, Providing Security Since 1977

Security services are the foundation of a successful organization and building on the by-products of security produce policy, procedures and processes that coincide with the business solutions we present. As part of our services of Information Assurance and Security services for the US Department of Agriculture (USDA), US Department of Treasury, US Secret Service (USSS), Alcohol Tobacco & Firearms (ATF), Drug Enforcement Agency (DEA), Law Enforcement Committee on Crime (LECC), Dept. of Interior, Bureau of Indian Affairs (BIA), Federal Bureau of Investigation (FBI), Dept. of Defense (DoD), and commercial organizations, we build our relationships one customer at a time and leverage the collective passion of our dedicated, experienced information technology professionals in providing you with strategic and practical solutions that permeate the infrastructure; as a result, heightening the confidence in the business functions.
